All Stago Drilling Machines are CE approved and have the strict German G.S. Certification.

Dry Ink Faster

X + Y = DRY is an ink drying additive that is popular with large press users for mixing into oil base inks.

It works by creating and spreading a source of oxygen throughout the ink. This oxygen is formed and released when the treated ink comes in contact with water, which promotes rapid drying.

- Rapid curing of ink
- Improves rub resistance
- No loss of gloss
- Reduces spray powder
- Works with all metallic inks
- Works with all oil base inks
- Speeds up ink drying

X + Y = DRY comes in a two-tube package that, when mixed, will treat approximately 110 kg of ink.

Available from Hudsons.
(244-10163)

HUDSON'S STACK WAGONS

- Australia's top paper trolley
- Up to 20,000 sheets
- A4 and A3 models
- Made in Australia
- 5 years warranty

A4

A4 model available with a table top as optional extra (not illustrated)

A3

SFS STIMULATED FOUNTAIN SOLUTION

- SFS Fountain Solution Anti-Calcium Formulation is specifically designed to aid ink drying on a variety of substrates.
- Achieves excellent on-press stability with a consistent pH ink/water balance, even when the dilution factor is altered.
- Promotes greater blanket lubrication and minimises piling.
- Improves start-ups and prolongs plate life.
- Prevents ink emulsification and works on all dampening systems.
- Does not cause foaming problems and prevents bacterial growth in the fountain.
- Very economical — dilute 2% to 3%. pH 4.8 to pH 5.3, depending upon water supply.

Available in 5 litre & 20 litre containers.
Codes 219-SFS-05(-20)
