JULY 1999

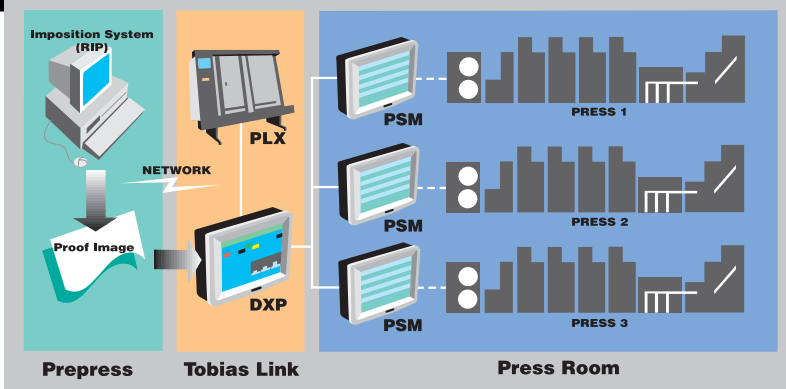

Introducing the Tobias TouchConsole™

EPLEX

PRESS PRESET SYSTEM

EPLEX FLOW DIAGRAM

EPLEX

PRESS PRESET SYSTEM

Digital presetting on your press **NOW!**

Faster makereadies with digital presets from A.E.HUDSON

*greater profits
increased capacity
faster makeready
reduced waste*

The new Tobias **EPLEX System** converts low resolution preview files from your CTP or Imagesetter RIP into coverage data that presets fountains on virtually ANY modern litho press.

BLANKET SPECIALS

GTO 46-52

2 PACK

Two GTO 46 or 52 Blankets for \$55.00

PLUS

Get a Free

330 gm tube of Easy Street Roller Clean and Conditioner Gel by Van Son.

5 PACK

Two GTO 46 or 52 Blankets for \$127.50

PLUS

Get a Free

Wash up blade

MO & KORD 64

2 PACK

Two MO or KORD 64 Blankets for \$79.00

PLUS

Get a Free

330 gm tube of Easy Street Roller Clean and Conditioner Gel by Van Son.

5 PACK

Five MO or KORD 64 Blankets for \$210.00

PLUS

Get a Free

Wash Up Blade and a Free 330 gm tube of Easy Street Roller Clean and Conditioner Gel by Van Son.

Specials available during July and August 1999

HUDSON'S GREAT RANGE OF AEROSOL PRODUCTS

for pre-press and the pressroom

Start Up:

Assists initial start-up of printing under 'cold' conditions before a press 'warm up' condition has been achieved. Also reduces excessive ink tack and picking.

Code: 221-AEH307

Stop Set:

Anti-skinning ink spray and roller conditioner. Developed for use with all letterpress and offset inks. Prevents overnight skinning of ink on the press, eliminating the need to wash up rollers and fountains.

Code: 221-AEH303

Ink Remover:

Softens up old, dried ink and dirt from presses, plates, type and numbering boxes and allows for its easy removal.

Code: 221-AEH325

Printers Silicone:

Forms a dry, heat-resistant film that renders any non-porous surface slippery. It eliminates sticking and repels water and ink.

Code: 221-AEH335

Engineers Yelder:

Prevents rust and corrosion, displaces moisture and lubricates. Excellent penetration properties providing maximum assistance in loosening 'frozen' metal parts.

Code: 221-AEH606

Spray Adhesive:

Pressure-sensitive adhesive for mounting photographs, artwork, posters, cardboard, foam rubber, styrene foam, glass, wood, cloth, metal, prints, plastic, fabric, etc.

Code: 221-AEH302

Great savings when you buy carton (12) lots.

Start Up _____	\$5.90 per 400 gm can (carton rate)
Stop Set _____	\$6.25 per 400 gm can (carton rate)
Ink Remover _____	\$6.00 per 400 gm can (carton rate)
Printers Silicone _____	\$6.00 per 400 gm can (carton rate)
Engineers Yelder _____	\$5.50 per 400 gm can (carton rate)
Spray Adhesive _____	\$6.25 per 400 gm can (carton rate)
Anti Static _____	\$9.20 per 400 gm can (carton rate)

PLUS a bonus of 12 epic wipers with every carton.

Bonus only available during July & August 1999.

Antistatic Spray:

Prevents static electricity on non-conductive surfaces. Useful around areas such as the feed board and delivery tapes or wherever a charge can accumulate.

Code: 221-AEH304

Control Fountain Solution Accurately

Alcohol Tester Hydrometer

Here's the easy way to test your fountain solution for percentage of alcohol. The Alcohol Tester Hydrometer is a handy pocket size (pen style), which accurately measures the alcohol content both prior to and after a few hours of running.

When the rubber top is squeezed it will take a sample of the fountain solution and the coloured balls sink or float. The fewer the number of floating balls the greater the strength of the alcohol. The plastic cover has the percentage scales imprinted on the side so that you can immediately gauge the alcohol strength against the applicable coloured ball.

It will measure the percentage of alcohol in a range of six bands from 0-5 per cent through to 25-28 per cent.

Inexpensive yet accurate, it is one of the handiest little tools a printer can have ... and you can get one now from HUDSON'S.
Code: 275-9000

pH and Conductivity Meters

Fountain solutions should be checked on a daily basis. Each check will take about 20 seconds yet can save hours in down time and wasted stock.

You need two pocket size, small electronic meters, similar to electronic test pens. One measures pH, the other conductivity. Both provide highly accurate digital displays.

The pH instrument measures 0 to 14 pH with an accuracy of 0.2 pH, while the DpHT meter for conductivity has a range of 10 to 1990 uS/umho. Other measurement ranges are available upon request.

Take the guesswork out of fountain solution control with accurate monitoring that will take no more than 20 seconds a day.

Micro Processor Based

pH Test Meters: Standard: 275-DPHT
Waterproof: 275-DPH-WP

Conductivity Meters: Scan 3: 275-DCT
Waterproof: 275-DCT-WP

Pre-press/planning Masking Sheets

Hudson's orange pre-ruled masking sheets save time and money. Experienced planners can work three to five times faster when they work with pre-ruled masking sheets, and novices will find planning much easier.

Masking sheets are made to suit most printing presses and include all reference lines needed for accurate negative positioning. This ensures the image is in the correct position on the plate after exposure. Saves down-time in make-ready on the press.

Code: 251-0000

Pre-Press 30" x 40" Golden Rod

Popular size 30" x 40" (762 x 1016 mm) masking sheets. Exposure proof, non-glare, genuine yellow Golden Rod, which is easier to cut without residual dust from clay coated type masking papers. Comes in competitively priced packs of 200 sheets. The practical size means that if necessary, they can be cut into two sheets of 20" x 30" or 4 sheets of 15" x 20".

Code: 251-3040-1
