INFINITY

The ultimate *acrylic ink*

AGFA  **PRESSMATCH DRY**

...from HUDSON'S

3 Simple Steps to a Dry Colour Proof

No Chemistry, No Water, No Processor.

- Pressmatch Dry is the high-turnaround alternative to single-sheet proofs that require chemical processing.
- It provides fast, high-quality proofs at low cost with no water, no chemistry and no processor.
- To use Pressmatch Dry, all you need is a laminator and an exposure unit.

It's as Easy as Laminate, Expose, Peel.

Why is Pressmatch Dry so fast?

Because there are only three easy steps to making a proof:

- 1) Laminate the colour layer to a receiver sheet...
- 2) Expose it to the separation film...
- 3) Peel the carrier.

Then, simply repeat these steps for each colour to create the final proof and post-expose it.

FAST ORANGE®

THE HAND CLEANER PRINTERS PREFER

Permatex Fast Orange® will not only clean more effectively, but will also protect your skin and be kind to our environment. Using the cleaning ability of high quality natural citrus oils, **Fast Orange** cleans hands thoroughly without the dangers associated with the harsh chemicals normally found in a hand cleaners that works so well.

Really Cleans, Really Fast

Superior cleaning performance, that's the promise that **Fast Orange** delivers. Faster and more effective than soap and old fashioned cleaners, **Fast Orange** melts the toughest dirt, ink and grease with ease for the ultimate clean. You'll be impressed - every time you use it.

It's Kind to Your Skin

If your hands are often covered in grease and dirt, then the chances are that your hands need all the help that they can get. Formulated with Aloe, Lanolin and Jojoba oils, **Fast Orange** helps to condition and protect your skin every time you clean your hands.

To order Fast Orange, phone or fax your nearest Hudson office or distributor. Quote 242-010-4 for 3.75 litre and 242-010-18 for 18.5 litre drums. Both sizes come with a free pump.

INFINITY

THE ULTIMATE ACRYLIC INK

Infinity is truly a breakthrough product. It performs flawlessly with all plate systems and stays open on the press overnight.

Infinity dries hard and fast, on both coated and uncoated stocks, so you can back up and fold sooner and get the job out the door faster!

Infinity ink:

- Dries hard and fast on coated and uncoated stocks.
- Stays open on the press and doesn't skin in the can.
- Runs with all plate systems.
- The unique acrylic varnish eliminates toning.
- For all types of small offset presses.

This versatile new product from Van Son is the closest thing yet to the all-purpose ink every printer has always wanted. Now there is little need to stock different inks for different jobs.

Once again, Van Son continues to lead the way into the next generation of ink products that help printers do their job better.

The fabulous new acrylic Infinity ink is available in universal black and the basic range of PANTONE colours off the shelf.

Hudson's offers an ink mixing service whereby you can order Infinity in any of the 1000 PANTONE colours in one kilo lots.

Damper Coverings for ALL Printers

GRIP FOUNT

A fine knitted fountain roller cover of cotton yarns with the addition of 20 per cent elasticated fibres. Its main advantages are durability, an even water distribution and ease of fitting. Available by the metre, Grip Fount will suit rollers 64 mm to 74 mm in diameter. Order Code 245-GF200-230.

HWD (Heavy White Dampasok)

Made from woven cotton with a more robust quality and greater water retention properties. As well as serving as a disposable top cover, it is also used as the forme roller cover on some web offset newspaper presses as an alternative to press dampeners. Available by the metre for 48 mm to 60 mm diameter rollers. Order Code 245-DHWD.

NEW MOL®

An excellent quality molleton cover giving superb water carry throughout the length of the roller. New Mol is a pure white, shrink fit cover. Its synthetic fibres are lint-free and are long wearing. Hudson's supplies a full range of sizes to suit every press. Available in cut lengths to suit your press or in boxed rolls. Order Code 226-N000.

NTL

The finest standard cotton cover available. The selected cotton yarns are knitted close together to give a finer rib than normal and then evenly cropped. The result is in a soft plush finish that permits a controlled and even dampening with minimum linting and no damping lines. Available by the metre or in 25 metre rolls, sizes range from 23 mm to 105 mm diameter. NTL is fitted to the roller by either sewing the ends or using nylon cable ties. Order Code 245-NTL.

SUPER- VEL

A long-life and non-linting loop cover made entirely of synthetic rayon yarns. Supervel consists of a durable absorbent pile knitted on to a moisture sensitive core that shrinks firmly on to the roller when wet to prevent twisting. Supervel is easy to fit on the roller and particularly easy to clean. Sizes range from 28 mm to 73 mm roller diameter and are available by the metre or in 25 metre rolls. Order Code 245-SL.

PRESSROOM SAFETY

Justrite Production Containers Help You Handle Flammable Liquids and Solvent Laden Cloth Wipes Safely and Economically

JUSTRITE OILY WASTE CANS

299-M9100-22.7 litres
299-M9300-37.8 litres
299-M9700-79.5 litres

An oily waste can is essential whenever solvent cloths and wiping rags are used. A Justrite Oily Waste Can from Hudson's remains closed when not in use. When operated by the hand or foot lever opening device, the cover opens up to an angle of not more than 60 degrees and closes automatically when released.

Its round construction and elevated bottom encourage circulation of air around the can to disperse heat and prevent spontaneous combustion. A one-piece cover facilitates the use of garbage bags to easily remove waste matter.

JUSTRITE PLUNGER CANS

299-M10208-1.89 litres
299-M103A08-3.79 litres

The Justrite Plunger Can helps you quickly and easily moisten cleaning cloths or wipes. Pushing down on the plunger fills the upper pan for moistening. Surplus liquid drains safely back into reservoir. The perforated pan screen also serves as a flame arrester. Top rims have moulded edge protectors for smooth, trouble-free moistening while the pump assembly is of a brass construction. Made of a heavy gauge metal, a Justrite Plunger will last for years

HUDSON'S 2001* PRINT CHEMISTRY FBW-2001*

Fast Blanket and Roller Wash

FBW-2001* is a fast, efficient and highly effective blanket and roller wash designed for use on all machines.

FBW-2001* consists of carefully selected solvent blend and additives to give excellent and fast cleaning action effects on blankets or the rollers of all types of presses.

FBW-2001* will not cause swelling or delamination of blankets and will not damage the rubber rollers or blankets in any way.

FBW-2001* used regularly will impede glazing of blankets and rollers, maintaining them in a clean, matt condition aiding their ink transfer properties.

Suitable for all types of blankets and rollers

- Fast and efficient
- Impedes glaze formation
- Harmless to rollers and blankets
- Prolongs life of rollers and blankets
- Aids ink transfer and release characteristics of blankets
- Ideal for both large and small presses
- Use straight from the container

FBW-2001* is packed in 5 litre (219-FBW-05) and 20 litre drums (219-FBW-20). From Hudson's of course.
