05

Tuesday 24th - Saturday 28th May, 2005
Melbourne Exhibition & Convention Centre, Victoria, Australia

HUDSON'S GREAT RANGE OF AEROSOL PRODUCTS

for pre-press and the pressroom

Start Up:

Assists initial start-up of printing under 'cold' conditions before a press 'warm up' condition has been achieved. Also reduces excessive ink tack and picking.

Code: 221-AEH307

Stop Set:

Anti-skinning ink spray and roller conditioner. Developed for use with all letterpress and offset inks. Prevents overnight skinning of ink on the press, eliminating the need to wash up rollers and fountains.

Code: 221-AEH303

Ink Remover:

Softens up old, dried ink and dirt from presses, plates, type and numbering boxes and allows for its easy removal.

Code: 221-AEH325

Printers Silicone:

Forms a dry, heat-resistant film that renders any non-porous surface slippery. It eliminates sticking and repels water and ink.

Code: 221-AEH335

Engineers Yelder:

Prevents rust and corrosion, displaces moisture and lubricates. Excellent penetration properties providing maximum assistance in loosening 'frozen' metal parts.

Code: 221-AEH606

Spray Adhesive:

Pressure-sensitive adhesive for mounting photographs, artwork, posters, cardboard, foam rubber, styrene foam, glass, wood, cloth, metal, prints, plastic, fabric, etc.

Code: 221-AEH302

Antistatic Spray:

Prevents static electricity on non-conductive surfaces. Useful around areas such as the feed board and delivery tapes or wherever a charge can accumulate.

Code: 221-AEH304

SPECIAL OFFER

Buy 12 cans or more of mixed aerosols (your choice of products) and get a **20% discount** off the single can rate.

Offer during March & April 2005

INK CANS

Question:

Do you find vacuum sealed ink cans are hard to open?

Answer:

Simply tap a nail to pierce the centre of the lid to break the vacuum seal. The lid is easily removed with an Ink Can Opener

FREE OFFER SICPA

Hudson's is a supplier of the Tempo range of Sicpa inks. Next time you place an ink order ask for a **Free Can Opener**. (you have to supply your own nail and hammer to break the vacuum seal)

TECH TIP #7

PAPER DRILL BITS

Hollow metal drills will break...

If you have a multi-head machine and want to drill only one hole with a 3 mm bit it will invariably snap off.

This is because the incorrect pressure has been used having previously been set for multi head drilling. It is imperative that the pressure is re-set for a lower strike when changing from multiple hole to single hole drilling. Another good practice is to check and re-set the depth stops when replacing drill bits.

Hudson's stocks the largest range of paper drill bits in Australia for most models of machines.

For further information go to www.hudsons.com.au

Blanket Scrubber

A great improvement in cleaning, loosening and lifting ink, gum, casein, clay, varnish and spray powder from blankets and rollers.

The **SCRUBBER** easily outlasts the equivalent of 300 or more cleaning wipes.

Inset shows the nylon pocket with cellulose sponge.

Order Code: 278-750
