## **WIRE STITCHER**

### **Heavy Duty Machine**

**For professional and economical wire stitching**

- Quiet operation 240 volt single phase power
- Either flat or loop stitching up to 180 staples per minute
- Wire diameter range 0.5 mm to 1.0 mm
- Flat and saddle stitching
- Flat to 25 mm thick
- Saddle to 8 mm thick
- Stabbing to 40 mm thick

**Stabbing 40 mm of paper using stitches from both sides**

Introma Supra Model ZD-2SR

**Meets the requirements of any size Bindery House**

# Pad Making is Easy

## with a Hudson Padding Press

Pads up to 500 mm Wide

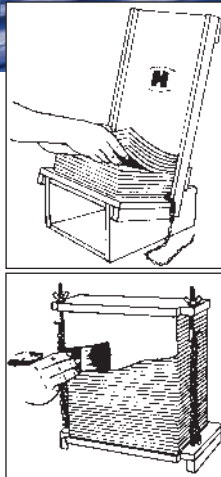

### HAVE ONE STACK DRYING WHILE STACKING THE NEXT!

With a Hudson Padding Press, production output will improve and cleaner, better padding will result.

Improved padding is particularly noticeable where perfectly registered forms are required on multiple sets such as duplicate and triplicate forms. The Hudson Padding Press is fitted with proper side guides where the stack is padded hard against the alignment rack.

Each Hudson Press comes with two pressure units so that while one stack of pads is drying, another stack can be padded.

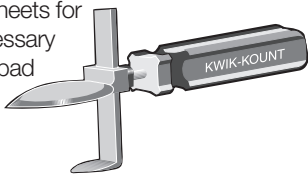

272-100

### The Quick Way to Count Sheets when Making Pads

This handy little gadget, the Pad Counter/ Kwik-Kount, reduces the labour-intensive counting of sheets for pads, unnecessary after the first pad is counted.

274-02877

### Padding Brush 214-120

Made in Australia specially for glue padding. 38 mm size enables fast application.

### Pad Knife 274-010K

Purpose-designed stainless steel knife to separate pads. Rosewood handle.

### Quick Pad Plus

- Dries Quickly
- Won't Retab
- One Coat Sufficient
- Thins With Water
- Non Hazardous
- Remains Flexible

Sizes in 1, 4.5 & 20 litres

225-002

Non-flammable  
Non-toxic

### Special - Buy 3, Get 4

In White or Pink - 4.5 litre size.

Until 30 Nov 2006.

## MDC Metering Roller Cleaner

### Allows Quick Start-ups Every Morning

Metering Roller Cleaner is designed to clean and desensitise metering rollers and all other rollers in the continuous dampening systems.

- Effectively degreases roller surface to maintain water receptiveness and improved transfer of dampening water.
- Will not harm sensitive rubber surfaces.
- Thorough cleaning action quickly removes repellent ink/water scum and oils.
- Ink/water balance is quickly achieved and maintained throughout the run due to an even supply of water over the dampening train.
- It removes ink build up and leaves the rollers clean and water receptive.
- Contains no aromatic, chlorinated solvents or ethylene oxide derivatives. High occupational exposure limit (OEL) for press room safety.

Apply to rollers with a rag or sponge and scrub clean. Allow the rollers to completely dry before starting the press. To ensure quick start-ups in the morning, administer MDC to rollers in the dampening system at the end of each day.

Available in 5 litres. 219-MDC-05
